GROSSE STK RIED

Categorisation: The Single Vineyard Pössnitzberg is predestined as a **great white wine terroir.** Due to the interaction of the soil structure and of the climatic factors this single vineyard is unique. These Sauvignon Blanc wines are very authentic. This wine from the Single Vineyard Pössnitzberg, one of our rarities, is delicately mineral, very salty on the palate, shows a tight structure and a high aging potential. The harvest yield is limited to a maximum of 45 hectolitres. As a rarity, this wine is allowed to be offered for sale at the earliest on the 1st of May after 30 months of maturation. **The name "Sorgenbrecher" refers to the history of our winery,** mentioned on the bottom of this data sheet. (The meaning of "Sorgenbrecher" is "to cut down worries").

Wine-growing area/ single vineyard: Steepness and extremely chalky soils account for grand, deep terroir wines - laborious and intensive manual work provided. The Single Vineyard Pössnitzberg is the **most southern single vineyard in Styria** and is very important for our winery. In the fifties our grandfather Johann Sabathi recognised the potential of the site Pössnitzberg and acquired the first core of this precious vineyard. This extremely steep and rocky single vineyard benefits from partly very old vines and deep roots. Due to an inclination of 75% this vineyard needs to be cultivated almost by hand.

Climate: Warm winds coming up from Slovenian valleys meet cool air streams from the Koralpe Mountains in the west. These **extreme temperature differences** cause a spicy and multi-faceted aroma spectrum.

Soil: From the geological point of view the Pössnitzberg is located within the southwestern Styrian sea basin. Approximately 16 million years ago some 1000 meters of mighty marine sediments accumulated. Geologists describe these fine marine sediments as "Styrian Schlier". It consists of chalky fine-sandy, mostly green-greyish marl clay or argillaceous schist with deposits of sand, fossils of leaves and gloss carbon residues. **These scarce and very chalky soils, called "Opok" (chalky marl), are characterised by a humous topsoil** formed by weathering, which often does not exceed a height of 20 centimeters, and firm sedimentary rocks.

„Der Pössnitzberger Sorgenbrecher ist eine Hommage an meinen Großvater Johann Sabathi. Dieser erkannte und förderte bereits in den 50er-Jahren die Besonderheit des Pössnitzberges. Schon damals füllte er seine besten Weine unter der Bezeichnung ‚Pössnitzberger Sorgenbrecher' ab. Zusätzlich ist dieser Wein meinem Urgroßvater Johann Sabathi gewidmet, welcher im Ersten Weltkrieg sehr jung sein Leben lassen musste." **(Erwin Sabathi)**

"The Pössnitzberger Sorgenbrecher is a homage to my grandfather Johann Sabathi. In the fifties he recognised and supported the high potential of Pössnitzberg. At that time he already named his best wines 'Pössnitzberger Sorgenbrecher'. In addition, this wine is also in memory of my great-grandfather Johann Sabathi. He died very young in the First World War." **(Erwin Sabathi)**
